Ari Gonzalez

agzfbg@gmail.com | linkedin.com/in/arigz | github.com/aimargz

Senior Computer Information Technology student and IT Student Assistant at CSUN. Experience supporting faculty computers, printers, and classroom equipment, with projects in Linux, networking, and Python. Seeking internships or entry-level roles in infrastructure and security operations.

Education

California State University, Northridge
B.S. in Computer Information Technology | Expected May 2027
Coursework: systems analysis, databases, cloud computing, cybersecurity, networking, data structures, and computer architecture.

Experience

CSMIT Student Assistant | California State University, Northridge
August 2026 - Present
- Set up and troubleshoot faculty Windows PCs and managed Macs, including software, updates, account access, and network connectivity.
- Prepare computers for reuse by removing drives, wiping storage, and working with Windows installation media.
- Troubleshoot network printers, drivers, queues, and paper-path issues; set up and repair classroom projectors, document cameras, and connected equipment.
- Help with Office, Outlook, Adobe Acrobat, and Creative Cloud; assist with Active Directory, server tasks, and tickets, documenting findings and escalating permission issues.

Security Professional | Allied Universal, Woodland Hills, CA
August 2025 - August 2026
- Handled access control, wrote incident reports, and escalated issues that needed attention.

Security Supervisor / Special Response Officer | GardaWorld, Woodland Hills, CA
November 2023 - July 2025
- Supervised coverage across multiple sites and coordinated incident response, badge access, reports, and shift handoffs.

Projects

- **Debian Home Server:** Set up a headless Debian 13 server on a ThinkCentre M73, configured Tailscale and SSH, disabled password-based SSH login, and verified remote access from a Mac.
- **Virtual Network Lab:** Used VirtualBox and pfSense to practice IP addressing, LAN/WAN configuration, DHCP, firewall rules, and network monitoring.
- **Python File Manager:** Built a terminal tool to organize files and work with metadata, hashing, and encryption.
- **AI Security Monitoring System:** Built a Python tool to classify security logs, store results in PostgreSQL, and display them in FastAPI. Tested edge cases that produced inconsistent output.

Technical Skills

Programming and tools: Python, SQL, Bash, FastAPI, PostgreSQL, MySQL, Git/GitHub
Systems and support: Windows, managed Macs, Debian Linux, Active Directory, printers, classroom AV, Microsoft Office, Outlook, Adobe Acrobat
Networking: VirtualBox, pfSense, IP addressing, DHCP, SSH, Tailscale
